

Simplified Audio Visual Room Solutions from Ashton Bentley

Ashton Bentley manufactures a range of modular “out of the box” Audio Visual technology for meeting rooms, conference facilities and executive offices. Designed to specifically reduce the cost of ownership and increase effectiveness of communication each Ashton Bentley System simplifies and standardises both the technology and the user experience of meeting room communications.

Unlike traditional Audio Visual systems an Ashton Bentley system replaces a room full of equipment; there’s no separate rack or complex wiring. The equipment is easy to use, the interfaces are intuitive and the installations are simple and quick with no tools or specialist skills necessary.

What does this mean for you?

The Ashton Bentley environment provides you with an easy to use, fully integrated Audio Visual system enabling video communication, document/application sharing (with whiteboard functionality) and presentations on a large screen, with superb audio. The kit is streamlined, compact and modular to suit a variety of meeting room formats and sizes.

Walk in and Work

An Ashton Bentley Lync Environment takes collaboration technology one step further with a cost effective solution that allows you to take your Microsoft Lync account (2010 or 2013) into the meeting room.

There’s no need for user training, the semi-automatic operation allows users to “walk in and work”.

Options for all sizes of meeting rooms

The modular range offers a standardised solution, whether you require a single screen set up or complete meeting room environment with integrated table and chairs. The systems are shipped flat packed in boxes and require minimal set up allowing simple global deployment.

For added peace of mind the software includes built in remote support functionality so there's no need to worry about complex maintenance procedures.

The system is particularly effective for multi-site installations where the equipment can be shipped and set up very quickly to offer an instant company wide meeting room solution.

Ashton Bentley systems are designed to provide “plug and play” collaborative HD presentation technology, plus optimised environments for the deployment of today's leading videoconferencing and telepresence platforms. Assembled in minutes with no tools the systems are supplied fully integrated and pre-configured with everything required.

Feltech believe the best way to appreciate the benefits of an Ashton Bentley system is to see one for yourself. We would like to offer you the opportunity to take a look at these systems at your own location and give you the chance to take one for a test drive. For more information or to book a demonstration contact Stephen Hollas on 01727 834888 or mail Stephen.Hollas@Feltech.co.uk.

Formed in 1989 Feltech have built an enviable reputation for delivering exceptional results across the industry, throughout all aspects audio visual and broadcast systems design, integration and installation.

Feltech provide innovative, effective and efficient results, using integrated systems to enhance presentations, communications and workflow, increase productivity, inform and engage.
